WHO WE ARE

NL Scientific Instruments Sdn Bhd was established in Klang, Selangor in 2009. Our company specializes in providing a wide range of construction material testing equipment, including: concrete, soil, steel, cement and mortar, aggregates and rocks, bitumen, asphalt and other laboratory testing equipment.

Over the years, NL Scientific has led and promoted the technological development of the construction industry in the Asia-Pacific region and made positive contributions to the modernization of cities in Malaysia as well as other countries. At the same time, the company is also actively involved in projects with local universities, the Polytechnic and the Road Development Authority, and translates customer research into deep technology and knowledge in civil engineering equipment manufacturing.

Adhering to the commitment of quality concept, the company pursues high quality, high value-added, high efficiency and customer satisfaction as its tenet, providing customers with professional and reliable technical consultation and after-sales service. The company's professional team has consistently understood the needs of its customers and developed highly accurate and efficient solutions to successfully win customer recognition and establish a good market reputation.

Through out the years of operation, we have exported our products to more than 60 countries and will continue to expand our business all over the world to pursuit our mission to be the leader in material testing equipment.

OUR VISION

Our vision is to become the world leader in civil engineering testing equipment by year 2030. We are focusing on providing sustainable precision construction material testing equipment with competitive value through consistent limit challenging action.
